Back-End:
Laravel, PHP, Python/Django

Tools & Platforms

Git, Github, Gitlab, Bitbucker, Docker, Figma, Adobe XD, VS Code, Postman

EXPERIENCE

Senior Full-Stack Engineer - Remote
Cloudswyft Global Systems, Inc. - *(Concurrent role)*
Oct 2022 - Present

- Built and launched the front-end of ICEI's Open edX learning platform, delivering a responsive UI now supporting 30,000+ active learners.
- Maintaining the production platform's application layer, resolving client-reported issues and debugging across the Python/Django and React codebases to ensure ongoing stability.
- Maintain and troubleshoot Xendit payment flows, diagnosing and resolving transaction and enrollment edge cases.
- Collaborate with DevOps on production issues, handling application-side debugging and resolution.

Full-Stack Developer - Remote
Born Malta (via Webee) - *(Concurrent role)*
Sept 2025 - Present

- Own end-to-end development of a social-services / benefits web application using Laravel and JavaScript/jQuery, from feature design through deployment.
- Work across four concurrent team projects, contributing to and unblocking multiple Laravel codebases beyond primary ownership, including an internal license-management system built with Laravel and Livewire.
- Integrated AI-assisted development into my workflow using Claude, authoring reusable skills, workflow examples, and CLAUDE.md conventions for faster, more consistent delivery.
- Manage version control and CI/CD via GitHub and GitHub Actions, maintaining automated build and deployment pipelines.

CONTINUED: EXPERIENCE

Full-Stack Developer - Remote

Offshorly - (Davao City)

Feb 2022 - Oct 2022

- Led the technical execution of the Auction Tale platform using VueJS and Laravel 9, successfully accelerating the MVP launch timeline.
- Managed and mentored a remote development team, establishing code-review standards and eliminating critical technical bottlenecks.

Independent Full-Stack Contractor - Remote

2018 – 2023

- Delivered full-stack and front-end web applications for international clients across the US and Singapore, using Laravel, Vue, React, and AngularJS.
- Easy BDI Course - Built and deployed an LMS with Vue 2 and Laravel; implemented interactive modules, automated exams, and certificate generation.
- California Ticket King (US) - Developed a secure payment portal (Slim PHP, jQuery) with third-party gateway integration, and a Laravel/Vue internal dashboard for customer and transaction management.
- Cenote Solutions - Built Pulse modules in React/TypeScript, including an IAM tool for analyzing Qualtrics survey data.
- VirtualStaff PH - Developed a ReactJS platform matching virtual assistants with employers, with real-time chat and time tracking.
- SBHE PTE LTD (Singapore) - Built an AngularJS project-management app front-end and contributed to Laravel-based APIs.

Web Developer - On-site

Note-e-fied Incorporated - (Davao City)

Mar 2017 - Jun 2018

- Developed and maintained two enterprise web apps (.NET, AngularJS, jQuery), building features and refactoring legacy code in a fast-paced team environment.

Software Developer - On-site

LOGIMINE S.A.S - (Davao City)

Mar 2016 - Feb 2017

- Maintained a JavaEE enterprise application and led development of a fuel management system as project manager and developer.
