Summary

Full-stack developer with 10+ years building and shipping production web applications. Laravel and Vue at the core, with React and Next.js on the front end and Python for backend and integration work.

Experience

Senior Full-Stack Engineer - **Cloudswyft Global Systems, Inc.**
Remote · Concurrent role · Oct 2022 - Present

- Built the front-end of ICEI's Open edX learning platform, which served 30,000+ active learners.
- Lead development of Cloudswyft's own learning platform (Open edX Sumac, Python/Django, React micro-frontends), not yet launched; supervise 4–5 interns building features for it.
- Maintained ICEI's production platform: fixed client-reported issues across the Python/Django and React codebases and resolved Xendit payment and enrollment edge cases, working with DevOps.

Full-Stack Developer - **Born Malta (via Webee)**
Remote · Contract · Concurrent role · Sep 2025 - Present

- Own end-to-end development of a social-services web application (Laravel, JavaScript), from feature design to deployment.
- Build and maintain integrations with external APIs and third-party accounting software.
- Contribute to 4 other Laravel projects, including a license-management system built with Livewire.
- Apply an AI-assisted SDLC with Claude Code across planning, building, deployment and maintenance, using my own reusable prompts and project rules; I review and own all code that ships.
- Manage CI/CD pipelines with GitHub Actions.

Full-Stack Developer - **Offshorly**
Remote · Davao City · Feb 2022 - Oct 2022

- Led development of AuctionTale, a real-time bidding platform (Vue, Laravel 9), from build to MVP launch.
- Led a remote team of 4 developers (2 back-end, 2 front-end) as full-stack lead: planned tasks, reviewed code, and set code-review standards.

Independent Full-Stack Contractor
Remote · 2018 - 2023

- Built web applications for 5 clients in the US, Singapore and the Philippines (Laravel, Vue, React).
- California Ticket King (US) - Developed a Stripe payment portal (Slim PHP, jQuery) and a Laravel/Vue internal dashboard for customer and transaction management.
- Easy BDI Course - Built and deployed an LMS with Vue 2 and Laravel; implemented interactive modules, automated exams, and certificate generation.
- Cenote Solutions - Built Pulse modules in React/TypeScript, including an IAM tool for analyzing Qualtrics survey data.
- VirtualStaff PH - Developed a React platform matching virtual assistants with employers, with real-time chat and time tracking.
- SBHE PTE LTD (Singapore) - Built an AngularJS project-management app front-end and contributed to Laravel-based APIs.

Web Developer - **Note-e-fied Incorporated**
On-site · Davao City · Mar 2017 - Jun 2018

- Developed and maintained two enterprise web apps (.NET, AngularJS, jQuery), building features and refactoring legacy code in a fast-paced team environment.

Software Developer - **LOGIMINE S.A.S**
On-site · Davao City · Mar 2016 - Feb 2017

- Maintained a JavaEE enterprise application and led development of a fuel management system as project manager and developer.

Projects

Gintanao (In development) - Davao real estate listing portal. Next.js front-end, Laravel + Filament back-end and REST API.
